What Your MD DOES NOT Want You To

Know: The news everyone is keeping an ear tuned to is the pending health care reform. However, there is no health care reform in the proposed Health Bills. The proposals have nothing to do with Health Care and everything to do with wealth transfer and control.

The current model of health care in our country is not health care it is sickness care. The only time you see a doctor is when you are sick. How many times have you called your doctors office to say you are healthy and would like to get a health check up? **The current model approach to health care is the wait until you have a problem.** Lets wait until you have fill in the disease _____ and we will schedule you for you name the test _____. This is not health care or preventative care it is “Do what you are doing care” and maybe we can catch it in its early stage before it gets out of control care. If we catch it early maybe we can treat it with medication or surgery.

What your medical doctor does not want you to know is that they have no incentive to keeping you from getting sick. **The only time they are making money is when you are sick.** What incentive do they have to get have to get you healthy? Now let me make this perfectly clear. When I need a medical doctor I want a medical doctor. They do wonderful things when people are in a health crisis. However most diseases today and health conditions are preventable. **The medical establishment has no incentive in preventing disease.** Do not be fooled by all of these so-called health screening and test being touted as prevention. **No screening or test ever prevented a disease,** they simple confirm you have a disease.

The “wait until you are having a problem” model of healthcare that is practiced by the medical doctor, authored by the American Medical Association (AMA), endorsed by the Health Insurance company and sponsored by the pharmaceutical companies are designed to profit off of your ill health. Medicine is a monopoly directed

by the AMA and protected by your government. **The AMA’s soul purpose is to protect, promote and stamp out competition.** The AMA claims to be the voice for every medical practitioner but they are not. There are many medical doctors that have recognized what is taking place and the failure of the wait and drug approach. A growing number in the sickness industry are feed up and are leaving for many reasons. They are looking for a better way.

Alternative care is the true health care model. Alternative care is proactive and promotes health and wellness by educating and practicing a healthy life style by giving the body what it needs to stay healthy. Now the AMA is doing everything they can to marginalize the Alternative Healthcare industry. They discredit herbal medicine, chiropractic, naturopathic medicine, supplements and tell you they are dangerous, unscientific and unproven. **What your medical doctor does not want you to know is that** the 3rd leading cause of death in the United States is iatrogenic death. Iatrogenic death is a result of you visiting your medical doctor. 250,000 people will die each year as a result of visiting their medical doctor and following the medical doctors prescribed treatment. These Statistics come from the July, 2000 Journal of the American Medical Association (JAMA).

Deaths Per Year	Cause
106,000	Non-error, negative effects of drugs ²
80,000	Infections in hospitals ¹⁰
45,000	Other errors in hospitals ¹⁰
12,000	Unnecessary surgery ⁸
7,000	Medication errors in hospitals ⁹
250,000	Total deaths per year from iatrogenic* causes

If you have sciatica or know some one who has sciatica and needs care, please do them a favor and refer them to New Hope Family Chiropractic, Riverside R.I. 433-3600. Waiting and hoping the
